Third Quarter 2009
Financial Results

October 30, 2009

Dear First Bancorp Shareholder:

I am pleased to report that the cash dividend for the third quarter of 2009 has been maintained at \$0.195 per share and it is at the same level it has been over the past four quarters. On an annualized basis, the \$0.78 dividend per share represents a yield of 4.19% based on the \$18.60 closing price of the stock on September 30, 2009. This is a very generous dividend yield given the current low interest rate environment we are in. We are pleased we have been able to maintain the dividend given the challenges that have faced the banking industry and the financial markets over the past few quarters.

The Company posted unaudited net income of \$10.4 million for the nine months ended September 30, 2009, down \$646,000 or 5.9% from the \$11.0 million earned for the same period in 2008. For the quarter ended September 30, 2009, net income was \$2.9 million, a decrease of \$942,000 from the third quarter of 2008.

On a positive note, net interest income which is derived from our core banking business was up \$5.9 million or 21.7% for the first nine months of 2009 compared to the same period in 2008. This strong performance reflects the strength of our revenue foundation. However, this increase in revenues has been offset by additional loan loss provisions to cover actual loan losses of \$3.7 million and a \$4.0 million net increase in the allowance for loan losses, an increase in FDIC insurance premiums and losses in corporate securities portfolio.

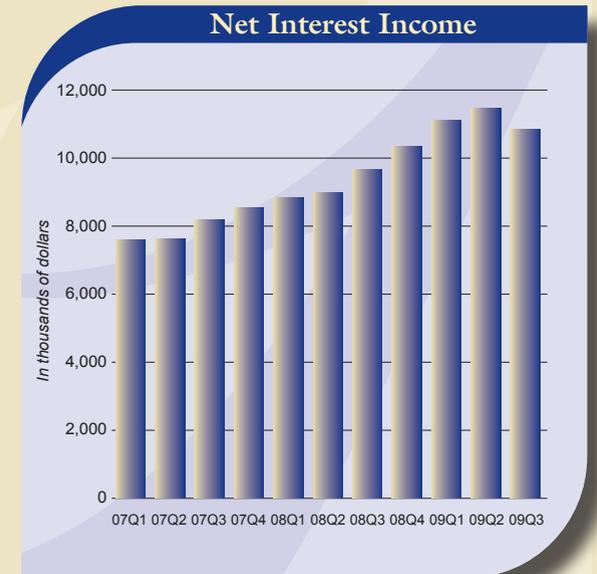

We have seen continued deterioration in credit quality of the loan portfolio. With prolonged broad-based weakness in the economy, an extended slump in the housing market and unemployment at 9.8%, which is at the highest level it has been since 1983, we are in the longest and the worst recession since the Great Depression. Not reflected in these unemployment numbers is the number of people who have experienced reduced incomes from wage cutbacks and loss of overtime. In our marketplace, many people are self-employed and are also experiencing a decline in business revenues impacting their individual incomes as well.

All of these factors have contributed to an increase in the Company's non-performing loans which stood at 1.80% of total loans as of September 30, 2009, compared to 1.57% as of June 30, 2009. Given the increase in non-performing loans and the continued weaknesses in the economy, we provisioned \$7.7 million to the allowance for loan losses during the first nine months of 2009 compared to \$2.3 million for the same period in 2008. As a result, the allowance for loan losses has increased by \$4.0 million year-to-date and is now at \$12.8 million or 1.31% of total loans compared to 1.20% at the end of June 2009.

Overall, we are pleased with the results thus far for 2009. The level of loan losses is elevated due to the weak economy and reduced real estate values; however, the Company has been in a position to cover the losses through increased revenues. Our return on average tangible equity remains very strong at 14.76% and the total risk-based capital ratio at 14.90% is well above the well-capitalized threshold of 10.00% set by the FDIC.

Sincerely,

Daniel R. Daigneault
 President & Chief Executive Officer
